

Oxygen Builder Travel Website Roadmap (OIA Caldera Style)

1. Project Overview

- Is project me ek modern travel landing page banana hai jisme hero section, slider cards, animations aur smooth UI hoga. WordPress + Oxygen Builder use hoga.

2. Required Tools

- - WordPress install
- - Oxygen Builder
- - Optional: ACF (Advanced Custom Fields)
- - Optional: WP Grid Builder ya Swiper.js (slider ke liye)
- - GSAP (animations ke liye best)

3. Page Structure (Wireframe)

- 1. Header (Menu right side)
- 2. Hero Section (Full screen image + text + button)
- 3. Destination Slider Section
- 4. Featured Cards Section
- 5. Footer

4. Step-by-Step Build Plan

- Step 1: WordPress install karo
- Step 2: Oxygen Builder activate karo
- Step 3: Header design karo
- Step 4: Hero section full width background image ke saath banao
- Step 5: Repeater + Flexbox se slider cards banao
- Step 6: Active card highlight animation add karo
- Step 7: GSAP ya Swiper.js integrate karo
- Step 8: Mobile responsive fix karo

5. Hero Section Design

- - Full screen background image
- - Left side text (title + description)
- - CTA button (Explore Destination)
- - Dark overlay for readability

6. Slider Section Logic

- - Repeater (Oxygen)
- - Each card = image + title + location
- - Active card zoom effect
- - Smooth horizontal scroll

7. Animation Plan

- - Fade in hero text
- - Slide transition for cards
- - Hover scale effect
- - Smooth easing (GSAP recommended)

8. Pro Tips

- - Always use Flexbox in Oxygen
- - Keep global colors defined
- - Use reusable components
- - Optimize images for speed
